Excerpt from High School Algebra: Elementary Course In writing the First Principles of Algebra the authors have had constantly before them two chief aims: (1) To provide a gradual and natural introduction to the symbols and processes of algebra. (2) To give vital purpose to the study of algebra by using it to do interesting and valuable things. Each of these aims leads to the same order of topics, which, however, differs somewhat from the conventional order. If it is admitted that there should be a gradually increasing complexity of forms-to be manipulated it follows that factoring and complicated work in fractions have no proper place in the first half year. This book is arranged so that factoring may begin with the second semester and complicated fractions may come still later. Simple fractions are treated in Chapter V. The pupil is introduced to the algebraic notation by recalling and stating in terms of letters certain rules of arithmetic with which he is already familiar. The simplicity of the algebraic formulas, compared with the arithmetical statement of rules...
