

## Popular Astronomy Volume 1; V. 1893-1894 (Paperback)

By Carleton College Observatory

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1894 Excerpt: .are mentioned which are appearing in the East and have not been noticed in preceding numbers. Observatory on Mont Blanc.-- We will soon give a picture of the Observatory on the summit of Mont Blanc, Switzerland, which is 15,780 feet above the level of the sea. It is the highest astronomical Observatory in the world, and has only recently been completed. Thinking that a general preview of the astronomical phenomena, which are to be expected during this year, would lie of interest to our readers, we have prepared the following notes. Eclipses.--There will be four eclipses, two of the Sun and two of the Moon, none of which will be of special interest. The first will be a partial eclipse of the Moon on March 21, beginning at 5h 57m A. M., and ending at 10h 44m A. M., central standard time. Only one-fourth of the Moon...

### Reviews

*Comprehensive manual! Its this sort of excellent read through. We have read through and i also am certain that i will going to read through once more again later on. You wont sense monotony at at any time of your time (that's what catalogs are for regarding in the event you question me).*

-- Prof. Geraldine Monahan

*This written publication is fantastic. I am quite late in start reading this one, but better then never. You will not feel monotony at at any time of your respective time (that's what catalogues are for concerning should you ask me).*

-- Tevin McClure
