

Radiation, Light and Illumination Volume 9; A Series of Engineering Lectures Delivered at Union College by Charles Proteus Steinmetz (Paperback)

Filesize: 5.14 MB

Reviews

This written ebook is excellent. It is amongst the most awesome ebook i have study. You will not truly feel monotony at whenever you want of the time (that's what catalogs are for regarding if you ask me).

(Devante Langworth IV)

RADIATION, LIGHT AND ILLUMINATION VOLUME 9; A SERIES OF ENGINEERING LECTURES DELIVERED AT UNION COLLEGE BY CHARLES PROTEUS STEINMETZ (PAPERBACK)**DOWNLOAD**

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1918 Excerpt: .arc flame. The positive terminal of the arc can be made sufficiently large and of such material as not to consume at all, and the trimming of the lamp thus reduced to the replacing of one electrode only--the negative. The negative electrode also can be made so large as to remain fairly cold, and therefore consumes only at the very slow rate required to supply the arc vapor, but does not consume by combustion or heat evaporation. Thus its rate of consumption can be reduced to 1 mm. or less per hour (while the open carbon arc of old consumes about 5 cm. of electrodes per hour), and thereby even with a moderate size of electrode a life of electrodes of 100 to 300 hr. or even much more secured. This method of feeding thus lends itself very well to long-burning arcs, as they are almost exclusively used for American street lighting. By electro-conduction higher efficiencies can be reached than by heat evaporation, as the arc vapor stream when produced by electro-conduction can be made to consist entirely of the vapor of the luminescent material, as when using metallic titanium as negative terminal. A disadvantage of the method of feeding the arc by electroconduction is the much greater limitation in the choice of materials: the material must be an electric conductor, which is stable in the air, and reasonably incombustible. In the method of feeding by heat evaporation any material can be used, as it is...
