

## Bulletin - United States Geological Survey Volume 509 (Paperback)

By Geological Survey

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1912 Excerpt: .

flat.crystals are orthorhombic in their symmetry and simple in their combination. The large face is taken as the brachypinacoid, and the chief forms noted, as shown in figure 4, are: 6(010), m(110), and e(012). In addition to these forms the macropinacoid a(100) is sometimes present as a narrow face. Occasionally the crystals are much longer and the prism faces more developed in comparison with the brachypinacoid. The common habit of the crystals is shown in figure 4. A better idea of the shape of the crystals can be had from figure 3, on page 53, which shows a variscite crystal so drawn as to bring the brachypinacoid (010) in front. The rectangular tabular shape of the crystals, due to the large development of the brachypinacoid, is well illustrated in the same figure. Several other forms are present on these crystals, but they could not be...
